PRESS DESPATCHES

NORWICH, CONN., THURSDAY, SEPT. 29, 1921

The Bulletin

Norwich, Thursday, Sept. 29, 1921

WEATHER Conditions

High temperatures for the season prevailed generally during Wednesday. There have been scattered showers within the last 24 hours in the Atlantic states. In the middle Atlantic and New England states the weather will be fair Thursday and become unsettled on Friday and be followed by cooler weather by Friday night.

Winds

North of Sandy Hook, Sandy Hook to Hatteras—Moderate south and south west winds, fair weather Thursday.

Forecast

Southern New England—Fair Thursday; Friday unsettled, cooler by Friday night.

Observations in Norwich

The Bulletin's observation show the following changes in temperature and barometric changes Wednesday:

Ther. Bar.
7 a. m. 60 29.80
12 m. 62 29.80
5 p. m. 67 29.80
Highest 72; lowest 60.

Comparisons

Predictions for Wednesday—Unsettled with probably light showers. Wednesday's weather—The guests in early morning followed by clearing and much warmer, southwest wind.

TAFTVILLE

Mrs. Luther D. Packer is passing a few days in Reading, Conn.

Mr. and Mrs. Wilfred Pollard of South Proctor street are the guests of Mr. and Mrs. Wilbur Dodge of Block Island.

The Home Department of the Taftville Congregational Sunday School held a social in the vestry of the church Wednesday evening. Refreshments were served. The affair was in charge of Mrs. James Hartley, the Superintendent of the Department.

A Community Sewing Class has been formed in the village. The class will meet Monday evenings in the Red Cross rooms in the Ponemah Building. The instructors will be Miss Mathilde Stuffer, Mrs. Lloyd H. Ordway, and Mrs. Thomas Crowe.

Mrs. William Emerson entertained the sewing circle Wednesday evening at her home in Lisbon.

Mr. and Mrs. Earle M. Wood gave a dinner of ten covers at their home on North Slater Ave. Wednesday evening in honor of Mr. and Mrs. William Avery of Newport News, Va., who are guests of relatives in town.

Joseph Leback has sold his property on Merchants Ave. to John B. Heston, and with his family, is leaving town.

The business section of Hunters Ave. is being greatly improved. The town of Norwich has a force of men working on the road, and the property owners are putting concrete sidewalks in front of their business blocks. This work now extends from the Thompson block, south to the property owned by Annabelle Deslandes. A new concrete walk has already been laid on the south side of the avenue, in front of the Sacred Heart property. The street will soon be one of the most up-to-date thoroughfares in the village.

The funeral of John James Sewe-huts was held Wednesday afternoon with a prayer at his late home on North B street at 1:30 o'clock, followed by services at the Congregational church at 2 o'clock. Rev. Arthur Varley officiated, assisted by Rev. George M. Owen of Hyde Park, Mass.

There were a wealth of beautiful flowers. The bearers were George Wheeler, George Kinder, Everett Pingree, Edward Seibert, Joseph Fletcher and Thomas Greenwood. Burial was in Maplewood cemetery where a committal service was read. G. G. Grant was the funeral director.

Investigating Pleasure Beach Fire
The state police have started an investigation of a fire at Pleasure Beach, which is believed by many to have been incendiary.

The residence of Charles Pyne, which with his store and garage, was burned by a fire on Monday morning, was the most valuable of the several cottages destroyed. Mr. Pyne carried insurance of \$5,000 on his store, cottage, dance hall and contents and \$1000 on a Buick sedan, which was underwritten by the dance hall.

It could not be learned how much insurance other fire sufferers carried, but it is understood to have been small in comparison with their loss.

Every thing being done to establish the cause of this fire, which is the third serious fire at Pleasure Beach within a comparatively short time.

CORNS

Lift Off with Fingers

Doesn't hurt a bit! Drop a Little Frezzone on an itching corn. Instantly that corn stops hurting then shortly you lift it right off with fingers. Truly! Your druggist sells a tiny bottle of Frezzone for a few cents, sufficient to remove every hard corn, soft corn, corn between the toes, and the calluses, with soreness or irritation.

Rotarians Hear Of School Health Work And Plans For Its Extension

The town's health programme in the schools was brought before the weekly meeting of the Rotary club Wednesday night at the Wauregan house by Rev. Dr. J. H. Selden, president of the Red Cross, who spoke of what had been accomplished in the past year in the health programme in the schools and outlined what extension of this is aimed at for the coming year under the town health board. He told the Rotarians that the annual town meeting to order the direction and at the expense of the town.

Dr. Selden and Miss Edith M. Rockwell, the new executive secretary of the Norwich Red Cross chapter, were the guests of the club and had seats at the head table with Richard L. Tarrant, who presided in the absence of President Lucius Briggs, who is attending the Rotary convention at Peabody Springs, Mass.

When introduced by Chairman Tarrant, Dr. Selden spoke as follows: Just a year ago you gave me an opportunity of presenting to the Rotary Club what was described as a New Health Program for Norwich. I shall be very glad to tell you today something of what has been accomplished during the past year, and of the advanced steps which ought soon to be undertaken.

This very significant step was taken at the town meeting of last year when this transfer was made. In January, 1920, as you will remember, with the approval of the school board, the Red Cross had supplied two additional school nurses. Last October this enlarged work was taken over by the town health officer, who associated with himself as an advisory committee Dr. Brophy, the city health officer, Mr. Graham, Superintendent of public schools, Miss Faith Leavens, representing the nursing service of the United Worker, Mr. James Macpherson, chairman of the public welfare committee of the Chamber of Commerce, and Mrs. W. T. Taiten, representative of the Red Cross. Through the past year the nursing service has been conducted by Miss Albertine, Miss Derr and Miss Moriarty with marked efficiency.

The first advanced step of the present year was a thorough medical inspection of all children of school age, made by four physicians of Norwich, Dr. La Pierre, Dr. Blackmar, Dr. Driscoll and Dr. Cassidy. The findings of the physicians were recorded on a series of cards, one for each child. A report was sent to the nurses to the parents of the pupils, calling attention to the physical defects discovered by this inspection. The value of this inspection in giving direction and increased efficiency to the work of the school nurses will be obvious to you all.

The expense connected with this medical inspection was met by funds supplied by the Red Cross. It has long been recognized that special attention should be given to the physical condition of the boys and girls. Nearly all the infections which cause children's diseases come through the mouth. Nothing, therefore, is more important than scrupulous care of the teeth and mouth.

After repeated consultations with the town health officer and his committee it was decided that the first step in the direction of dental and oral hygiene was a dental survey, as complete as possible showing the mouth conditions of our boys and girls.

After repeated consultations with the town health officer and his committee it was decided that the first step in the direction of dental and oral hygiene was a dental survey, as complete as possible showing the mouth conditions of our boys and girls.

When this summary was made by Miss Albertine, I confess I was appalled by the conditions revealed. Nearly half of all the boys and girls show physical defects, some of them of a very serious nature, unless corrected, to materially handicap them in later life. Of the 5,500 pupils not more than 300 have sound teeth and clean mouths. I suppose here is to be found an explanation of the fact that over 800 children are known to have diseased tonsils and adenoids, and nearly 300 show evidence of infected glands.

On consulting Dr. Prest of New York, one of the most eminent authorities in matters connected with public health, I was assured that conditions in Norwich are not worse than those prevailing in other communities without an adequate health policy. But this gave me, as I think it will to you, very small comfort. Norwich ought to have an adequate health policy. We have no right to permit these conditions to continue, and when the facts are known I think the good people of Norwich will not rest until they have done every thing in their power to assure to the boys and girls of this community that indispensable condition of a fair start in life, sound, healthy bodies.

In speaking of a new health program for the opportunity of an education. For we do not overlook, least of all discredit, the splendid service rendered by the various departments of the United Worker. I cannot escape the feeling that Norwich ought to have an adequate health policy. We have no right to permit these conditions to continue, and when the facts are known I think the good people of Norwich will not rest until they have done every thing in their power to assure to the boys and girls of this community that indispensable condition of a fair start in life, sound, healthy bodies.

But many of us feel, and I am sure you will sympathize with us, that the proper care of the health of the boys and girls of Norwich belongs to the community as a whole, and it ought to be directed and maintained by the community. We provided every child with the opportunity of an education. For their own sake, and no less for the sake of the town, they must be trained and fitted for their work in the world. But no one can question that the value of the training they receive will depend very largely on their health and vigor. If they go out into the world physically handicapped just so far their satisfaction in life and their efficiency as members of the community will be hampered.

This then is our health program: So far as the boys and girls of school age are concerned, we seek an improvement in the conditions under which they live, their protection against contagion, their training in the fundamental laws of health, and further such assistance as we can provide in removing the physical defects, likely to interfere with their efficiency and retard the years to come; all this to be regarded as the inescapable obligation of the community. The enterprise to be carried forward under the direction and at the expense of the town.

For instance, Norwich expends \$210,000 a year on our public schools. It is a large sum, but no one begrudges the money. We only wish we had at command the funds to take care of our schools what they ought to be well equipped, making full use of the modern methods of training. The amount of money required to carry out our health program is relatively small. We were able to inaugurate the work last year on an appropriation of \$5,500. But the very important medical and dental surveys were paid for by the Red Cross. This work Dr. Thompson wishes to take over this year. The experts we have consulted tell us that the reserves made this year will double the value of the work previously done. To meet this expense, and to provide equipment needed in the nursing service, \$7,500 will be needed. An appropriation of this amount will be asked for at the town meeting.

I am very sure of your interest, and of your cordial sympathy with this endeavor to secure better health conditions and thorough health training for all the boys and girls of Norwich. I have a definite request to make. The town meeting does not provide an opportunity for detailed consideration of this matter. I venture to ask that the members of the Rotary, present and absent, support the resolution calling for this appropriation, and that a number of men express their approval of the health policy to which the town now stands committed. This would put new hope and courage in the hearts of all those who have the welfare of the boys and girls of Norwich at heart.

If this appropriation is voted the Red Cross will undertake the very important work of dental and oral hygiene.

Medical Inspection Summary.
Dr. Selden had printed slips distributed, showing the following summary of the medical inspection of Norwich school children, 1920-21: Number children examined 5,586, number defects found 4,447, number children with defects 2,375, number children with enlarged tonsils and adenoids 115, number children with defective vision 287, number children with enlarged neck glands 317, number diseases of ear 25, number diseases of nose 13, number diseases of throat 3, number diseases of lungs 16, number diseases of heart 41, number diseases of skin 55, number mental cases 18, number deformities cases 21, number weighed and measured 5,696, number nutritional cases 525, number under weight 1,534, number 10 per cent. under weight 825.

Dental Survey of 4,851 Children—Percentage of children found having defective teeth \$4.57, percentage of children with tooth brush \$2.55, percentage of children needing prophylactic treatment \$8.82, number of children having teeth filled 12,871, number of children having permanent molars removed 5,621, average number cavities per child 5.62.

Significance of Figures.
Dr. Selden invited Dr. Hugh B. Campbell, superintendent of the Norwich state tuberculosis sanatorium, to speak of the significance of these figures, to which Dr. Campbell responded by commending the health programme, and saying it was of no small importance that the community interest that Rotarians could back. Picking out some of the figures from the Norwich report, Dr. Campbell said that the school children with enlarged tonsils and adenoids might develop into tuberculous cases. Diseased tonsils should be removed and all adenoids should be taken out as they make the person a mouth-breather instead of a nose-breather, those immensely increasing the liability to infection from disease. These corrective health measures work towards making the children healthy, strong individuals for our future citizens.

Miss Rockwell, Executive Secretary.
Dr. Selden also introduced Miss Rockwell, who spoke of the dental work with which she had been connected at Plattsburg, N. Y., where 450 children were looked after for six months and a travelling dental unit was arranged to take the country schools. The school attendance was increased so much and the general standard so much improved that the teachers begged to have the work continued.

A riding vote expressed the appreciation of the Rotarians in hearing what the speakers had to say.

In the business part of the meeting, after Howard Baker had spoken of the athletic at the Norwich Free Academy, the club voted a \$25 appropriation to the Academy's athletic fund. Al Bliven succeeded Howard Baker as speaker for the latter part of the meeting after Mr. Baker had been called away. There was a solo by Henry La Fontaine, several numbers by selected quintettes, and Bill Parker was called upon to conduct his famous farm song as a special mark of recognition of the one woman guest at the meeting. He gave one of his most finished productions of this popular number with the Rotarians.

BISHOP HUGHES TO SPEAK
AT SUNDAY SCHOOL CONVENTION
The State Sunday School convention for 1921 will be held in New Britain, Nov. 3.

Bishop Edwin H. Hughes of Boston will be the principal speaker of this convention. Bishop Hughes was born in a West Virginia parsonage in 1865. He

was a student in the local schools and later attended Grinnell College, where his father was the pastor for many years.

He received the A. B. and A. M. degrees from Wesleyan, while the D.D., an S. T. D., and also L. L. D., were given him later by Boston University. He was a pastor in New England when called to the presidency of De Paul University. In 1908, the Methodist Episcopal church conferred its highest honor upon this worthy son of the parsonage by electing him bishop. He now resides in Boston, having New England as his Episcopal area.

Some of the other speakers of the convention are Miss Margaret Slattery, Rev. Harold C. Humbert and Rev. F. M. Sheldon of Boston, Rev. W. H. Halpin of Chicago, Prof. Luther A. Welles of Yale, and Miss Elizabeth Colson and Miss Josephine Baldwin of New York.

What is it that has poisoned the waters of Long Island Sound during the bathing season now drawing to a close, causing serious illness, and in at least one instance death, to the bathers who have innocently frequented the shore resorts in pursuit of pleasure and relief from torrid heat? says the New Haven Register. Bathers who have gone into the cooling depths with no thought of harm or unseen danger have returned to their homes only to find themselves in a few hours in intense agony, the cause to them generally unknown.

Physicians and diagnosticians have been taxed to the limit in tracing this mysterious ailment and unearthing from the harmless looking waters of Connecticut's bathing places its cause.

Several theories have been advanced as to the cause of this strange affliction and perhaps the most plausible is that put forth by Dr. Frank L. Phillips of New Haven whose supposition is that it is caused by the little, white jelly fish with which the waters of the Sound around New Haven teemed all summer.

The death of Carl H. Payard occurred Saturday in New Haven from meningitis which developed after he had been bathing and gotten water in one of his ears. This brought the most severe pains to the affected member followed by mastoiditis and the meningitis which caused his death.

The trouble which always first affects the ears has been reported all along the shore west of New London to Greenwich. In New Haven there have been at least 100 cases brought to the attention of physicians and probably many more that have not had treatment. Dr. Phillips, a specialist of diseases of the ear, has relieved some 15 cases.

The suffering always results from taking salt water into the nostril which finds its way into the Eustachian tube, and then in the inner ear where infection sets in. This often causes abscess and sometimes mastoid trouble. In an interview for The Register Dr. Phillips says: "There is something in the water which has caused irritation of the mucous membranes. It either carries germs or the irritation sets up of itself inflammation that it gives the germs normally in the tissues a chance to get to work breaking down these tissues and making putrefaction. The trouble sometimes goes into the operative stage."

It is Dr. Phillips' supposition that the trouble has been caused by the millions of jelly fish, each about the size of a silver dollar, which infested the Long Island Sound waters all summer. These were so thick in some places that it was impossible to take a swimming stroke without coming into contact with masses of them.

NEW LONDON LOSES
BROWN COTTON GIN CO.

A certificate of dissolution has been filed by The Brown Cotton Gin Co. of New London. This was at one time a leading industry in that city and for many years gave steady employment to a large number of hands. As its name implies the company manufactured machinery for ginning cotton.

On Dec. 24, 1915, the Brown Cotton Gin Co. sold out the business and the plant on Pequot avenue to Robert A. Herrick, a Boston lawyer, who was formerly coach of the Harvard rowing crew. It is understood that Mr. Herrick was financially interested in the Reed-Prentice Co., which at that time operated two plants in Worcester. Mr. Herrick bought the local property with his own funds at a time when the demands of war taxed the capacity of the Worcester plants and he leased the local plant to the Reed-Prentice Co. calling this the Brown Cotton Gin department. One plant in Worcester was known as the Reed department and the other the Prentice department.

Later the Reed-Prentice Co. acquired the local plant from Mr. Herrick and subsequently sold it to The Babcock Printing Press Manufacturing Co., the present owner.

Edward T. Brown, George T. Brown and other members of the family in New London were the owners of the Brown Cotton Gin Co., which has been out of existence as a live industry since 1915.

Pastor Olsson Going to California
Rev. J. Herman Olsson, pastor of the Rev. J. Herman Olsson, pastor of the church of Waterbury has just announced his resignation. He will preach his farewell sermon to his congregation on New Year's day and will leave during the first week in January for his old home in Los Angeles, California, from where he will leave about a week later for Los Angeles, California, where he will assume the duties of pastor in the First Lutheran church of that city.

Mr. Olsson has been pastor of the Waterbury church for the past nine years.

SHORT CALPNDR SESSION DISPOSES OF MOTION LIST

The September session of the civil superior court opened in New London Wednesday morning with a short calendar session for the assignment of cases and hearings of motions. Judge Allyn L. Brown was on the bench. This was Judge Brown's first civil session since assuming the bench on the retirement of Judge Gardner Greene.

The following matters were disposed of at the short calendar sessions: Two weeks in which to file answers or other pleadings were allowed in the cases of Blankenship vs. Charnariz; Terault vs. Nawrocki; Estinne vs. Lincoln; Fisher vs. Lebanon Valley Iron and Steel Company; Wall vs. Cornell; Vendito vs. Tanager; Bell vs. city of New London; Rabinovitch vs. Schmuckler; Babcock vs. Abernethy; Gleason vs. Gleason; Wills vs. Wills, et al.

Second orders of notice were granted in the cases of Hamilton vs. Hamilton; Downing vs. Shaffer; Shaffer vs. Shaffer; Vars vs. Vars; Stevens vs. Stevens; Dembowska vs. Dembowska; and Tucker vs. Tucker.

A continuance for three months of a second order of notice was granted in the case of Isham, et al. vs. Burlant, et al.

Judgment for foreclosure was granted in the case of Meyer H. Hollander, et al. vs. John L. Speaks, et al. The amount of judgment was \$181.00 and the mortgage was on property in Phillips street.

Judge Brown granted the foreclosure of a mortgage on property in Franklin in the case of Wolinski vs. Wolinski, et al. The amount of the judgment being \$1,027.35.

Motion of the United Wholesale Grocery Co., for permission to file claim with receiver in the case of Neleber, The Coldwater Farm & Produce Co., was granted.

Judge Brown entered an order confirming William Z. White as permanent receiver of Shaleit's Cleaning & Dyeing, Inc., and limiting the time

for the presentation of claims to four months from October 15.

An order for alimony pendente lite of \$7 a week beginning at once and payable weekly was entered in the case of Edna J. Bowe Brown vs. Herman B. Brown.

Permission for the defendant to file an amendment to the cross complaint in the case of Latham vs. Latham was granted.

SIX MONTHS IN JAIL FOR THEFT OF A COW

Louis Renot, of Groton was sentenced to six months in jail by Judge Allyn L. Brown in the criminal court in New London Wednesday morning on a charge of theft of a cow. The case against Charles Brown, charged with the same crime, was nolle. They were brought in on a bench warrant accusing them of stealing a cow valued at \$40 from Herbert B. Pierce of Groton.

FORESTERS NAME COMMITTEE ON PERMANENT HEADQUARTERS

A large and interesting meeting of Court City of Norwich, No. 63, Foresters, was held Tuesday evening. Seven men were initiated and eight applications were renewed. A committee was appointed to find permanent headquarters and a committee was selected to arrange for a dance to which the Companions of the Forest of New London will be invited. About thirty of the members accepted the invitation of the Companion in New London last Friday night which was their twenty-second anniversary. They enjoyed the banquet and dance and were treated so well that they did not return till a late hour and will try and return the compliment when they come up here.

Hospital Grants Approved

First installments of the new hospital grants allowed by the general assembly have been approved by Governor Lake. These include \$2,125 for the William W. Backus hospital, Norwich; \$2,250 for Lawrence and Memorial Hospital, New London; \$2,250 for Day-Kimball Hospital, Putnam.

POETRY

THE SOLITARY REAPER

Behold her, single in the field,
Yon solitary Highland lass!
Reaping and singing by herself;
Stop here, or gently pass!
Alone she cuts and binds the grain,
And sings a melancholy strain;
Oh! listen to the vale profound,
Where overflows the sweetest sound.

No nightingale did ever chaunt
More welcome notes to weary bands
Of travellers in some shady haunt,
Among Arabian sands:
No sweeter voice was ever heard
In springtime from the cuckoo bird,
Breaking the silence of the seas
Among the farthest Hebrides.

Will no one tell me what she sings?
Perhaps the plaintive numbers flow
For old, unhappy, far-off things,
And battles long ago:
Or is it some more humble lay,
Familiar matter of today?
Some natural sorrow, loss, or pain,
That has been, and may be again?

What's the theme, the maiden sang,
As if her song could have no ending;
I saw her singing at her work,
And her eyes fell in a dreamy way,
And as I mounted up the hill,
The music in my heart I bore,
Long after it had ceased to pour.

Oh, to be back on the farm in October,
After the busy of summer. The recovery
Of the town now so gray and so
solitary.
Back to the joys of nature once more.

The trees in the orchards are shading to
land,
The colors of Autumn are everywhere
a melody.
The wonder of nature is on every
hand.

Ah, how we exiles who dwell in the city
Long for the farm in the fall of the
year.
Well may the country-folk hold us in
pity.
We are severed from things that
are dear.
Farm Life.

HUMOR OF THE DAY

First Kunt—I wonder why those girls don't answer us when we spoke to them.

Second Kunt—Oh, I expect they're telephone girls!—Exchange.

Kirk—Man wants but little here below!

Patrick—And he's the only fellow who gets what he wants.—Wayside Tales.

Bix—I hope you aren't one of those who borrow trouble.

Dix—No, I borrow money to get out of trouble.—Boston Transcript.

Teacher—What have the various expeditions to the North Pole accomplished?

Dull Boy—Made geography lessons harder.—Stray Stories.

Wife—Did you notice the coat on the woman sitting in front of us this morning?

Husband—Er—no. Afraid I was doing most of the time.

Wife—Um. A lot of good the service did you.—Chicago Tribune.

Judge—How do you explain the fact that you were in your stocking feet when caught?

Burglar—I was told some one of the family was sick.—Boston Globe.

"I'll never forget," said Cactus Joe, "the time Crimmon Guich decided that all us citizens ought to disarm."

"Did the boys agree?"

"Yes. It worked out fine till Tamale Tom found out where the weapons cached and took possession. The recovery of our right to self-preservation was one of the most prolonged and agitating events in Crimmon Guich history."—Washington Star.

KALEIDOSCOPE
Helen of Troy had red hair.

Women take the place of newsboys in Spain.

All skins from India have been treated with salt in curing.

The United States has sixty times as much water power as Great Britain.

Of the total number of 1,277 characters in Shakespeare's plays, 147 are females.

The present year marks the 400th anniversary of the death of once de Leorn, the discoverer of Florida.

Miss Helen Porter, twenty years old, is a rental manager of Omaha's largest and most fashionable apartment house.

Home Economics students at the Oregon Agricultural College take a course in household management which includes taking care of two children.

The wife of Signor Mascagni, the famous composer, was a very beautiful woman. It consists of an Italian silver piece punctured with six round holes, in which are hung six pearls first teeth of her little daughter.

Six sermons of the Rev. George L. Patterson, pastor of the South Congregational church of Salem, Mass., were stolen while he was on a tour through the west from which he returned recently. A thief broke into the church and made off with the manuscripts.

In normal times the world's approximate consumption of coal amounts to 1,200,000,000 tons, of which total Great Britain normally produces about 275,000,000 tons. The normal domestic and industrial consumption of coal each year in Great Britain is 190,000,000 tons; the rest of Great Britain's production is exported.

On the island of Jersey there is a curious but pretty marriage custom. As soon as the ceremony is over, and when the happy couple are entering into occupation of their house, a large granite slab over the porch is inscribed with the initials of the bride and bridegroom, and between the two a rough representation of two hearts is engraved, the whole thus forming a unique marriage certificate for all the world to see.
